**United States Sales & Dispatch – 1-682-628-4841**

Dear Industry,

RECON Petrotechnologies is pleased to announce the return of one of the industry's most notable names in Open Hole Logging in the North Texas Region. Doyle Carson along with his essential team member Casey Epperson have joined the RECON team in Texas.

Doyle, a former Dresser Atlas Logging Engineer, has been working in the Wireline Industry in North Texas for over 40 years with time spent driving sales at IPS, RECON and most recently Tucker / STEP prior to their closing down of Open Hole Operations in the US. Over the last 40 years, Mr. Carson has been engaged in well log evaluations leading to many success stories for North Texas Operators. Mr. Carson's passion aligns with RECON's vision, together we look forward to raising the standard in Service and Quality.

As the industry works through this slow time and activity levels return we are happy to know that Doyle's knowledge and experience is on our side so that RECON can continue to provide the Service and Quality that is the foundation for any great business to survive and thrive through the ups and downs.

Feel free to reach out to Doyle at:

940-391-1766
